

Entre-Prises at the climbing World Cup in Villars (Switzerland) 7 and 8 July 2017

28 June 2017

The Climbing World Cup returns to Villars for the second time on 7 and 8 July, with the town hosting the Lead and Speed disciplines. The IFSC-organised competition takes place outside on an artificial structure, against a magnificent Alpine backdrop. Entre-Prises is providing the two Lead and Speed walls.

The Lead competition will be the first of the 2017 World Cup stages. Tensions will be running high for the climbers, all determined to show their motivation and form for the next stages. The Villars World Cup Speed competition will be the second stage.

Following on from the Qualification rounds on Friday 7 July, Saturday night's Finals are sure to make a stunning spectacle!

Entre-Prises, an active partner in competitions!

For the second year running, the competition walls will be provided by Entre-Prises (EP):

- Lead wall with wooden macro volumes
- 15m-high Speed wall

Temporary, modular Lead wall

Key features:

Quick to install, including the primary structure: 2.5 days (no scaffolding required)

Storage: Three 12m containers

Entre-Prises Mozaïk technology

4 giant macro volumes create featuring on the wall and a host of options for route setting

Height: 15m

Surface area: 209m²

Maximum overhang: 8m

Speed wall

Key features:

Quick to install, including the primary structure: 1.5 days (no scaffolding required)

Storage: Three 12m containers

Entre-Prises Mozaïk technology

Height: 15m

Width 3m

Total surface area: 46m²

A must-see stand in the exhibitor village!

Monkey Space recently won the OutDoor Industry Award in the "Concepts and Services" category, and the French OutDoor Award at the Outdoor Show in Friedrichshafen, Germany. Visitors will be able to explore a module of this brand new training structure, and find out how this innovation works.

ENTRE-PRISES, OFFICIAL MANUFACTURER OF IFSC-CERTIFIED SPEED WALLS - UNIQUE IN EUROPE
Structures used in official world record speed competitions are regulated by the IFSC. Walls must be constructed and/or certified by an official speed wall manufacturer, then declared to the IFSC to obtain certification, which is valid for 4 years. Before every event, the wall with its timing system and speed holds has to be approved by an IFSC representative.

 **ABOUT ENTRE-PRISES:**

<http://www.entre-prises.com>

Entre-Prises (EP) is part of the ABEO Group and a pioneer in the climbing structure industry, designing, manufacturing and installing bespoke solutions to develop the sport of climbing throughout the world.

From teaching walls to complex structures for international competitions, EP solutions are suitable for climbers of all standards.

EP acts as a true local partner: the “à la carte” services available include artificial climbing structures, holds and accessories together with maintenance, training and route-setting services, providing comprehensive support for customers with their projects.

As a partner to the IFSC (International Federation of Sport Climbing), EP is committed to playing an active role in developing climbing for all.
